1. A question needs linked evidence to answer

How do mechanism, cohort omics, and target evidence jointly support ABL1 in AML?

same cancer

Mechanism
literature

same gene

Patient Omics
TCGA cohort

complements

Target Support
literature

2. Same evidence with different knowledge shapes

Document Corpus

flattened passages

Semantic KG

path
gene
AML

context reduced triples

Evidence Graph

evidence bundle
evidence logic

context and logic retained

3. RAG performance changes

RAG Challenge Shifts

Representation improves access

Converts evidence into answers
